RE: DON'T PUNISH PAIN Nationwide Rally April 7, 2018 12 p.m. EST

Dear [official's title and last name],

I am writing to you on behalf of the chronically ill community. The "illegal illicit Fentanyl/Heroin" crisis has been overcorrected by the CDC, which has led to another atrocity: THE CHRONICALLY ILL NEGLECT EPIDEMIC.

The unattainable and unjust CDC guidelines have left millions, who suffer from chronic illnesses, such as Crohn's Disease/Colitis, Sickle Cell, Fibromyalgia, Ehlers-Danlos Syndrome, Chiari Malformation, Arachnoiditis, and thousands of other painful illnesses, "homeless" in the medical community.

Primary care physicians as well as pain management centers will not, or cannot, treat their patients because they fear retribution from the DEA.

The chronically ill have been expunged from the country. Veterans, who have fought for our country, are forgotten and left to suffer in pain. Millions of family members are forced to watch their parents, children, and loved ones suffer and be neglected due to the umbrella restrictions placed by the CDC.

Millions have abruptly been taken off their medication which has lead to their demise. These Americans with documented illnesses, who have been taking their prescribed medications for years, have had their pain management stripped from them or greatly reduced, with no explanation, other than, "We cannot treat you due to the CDC guidelines." People are committing suicide because their pain is greater than their will to live.

Many in the chronically ill community are disabled, pay their Medicare premiums, and yet are still not receiving the services they need and pay for.

WHY?

Please join us in our DON'T PUNISH PAIN Rally to show your support for the chronically ill community. This is a large step in our fight to have the CDC regulations modified to fit the needs and concerns of all Americans. Together we can make a change and help those in need.

Best Regards,
