

JOIN THE **DON'T PUNISH PAIN MOVEMENT!**

WHO ARE WE?

We represent hundreds of millions who battle severe pain every single day.

WHY RALLY?

This rally gives us a united voice and gains nationwide media coverage.

WHO IS AFFECTED?

- People with chronic pain.
- People with acute pain.
- People with postoperative pain.
- Physicians. Pharmacists.
- Veterans. Cancer patients.
- **EVERYONE!**

- The CDC and DEA have **bullied** hospitals into not providing safe and effective pain medication.
- Patients are now at risk of **torture** by doctors who refuse to prescribe pain medication.
- Millions of Americans who were managing their pain are now being **forced** to quit their jobs and go back to their beds.
- The current CDC guidelines that were intended for the illegal Fentanyl/Heroin crisis have caused a **disastrous** over-correction in pain care.
- Many physicians and hospitals have **stopped treating pain altogether**.
- The DEA has **reduced the production of pain medication**, which has worsened a nationwide shortage.

Support the victims of the fake opioid crisis: **those living with chronic pain** now abandoned, and **anyone going to an ER or OR.**

Make Health CARE Again!
